

MA 518: DATABASE MANAGEMENT SYSTEMS

MONSOON 2021

LAB #2: PHP Basics

1. Write a PHP program to create a 3 x 3 tic-tac toe board using nested for loop.

2. (a) Write a PHP program to create a CSV file "lab2_data.txt". The file will have four columns – subject name, subject code, credit and grade separated by commas. Sample entries of the file lab2_data.txt is given below

OS, CS 346, 6, AB
DBMS, MA518, 6, AA
Networks, CS348, 6, AB
Networks lab, CS349, 3, AB

.....

- (b) Read the text from the CSV file that you created above and print the subject name and grade. Further you should also compute the SPI (semester performance index).
