

MA 518: DATABASE MANAGEMENT SYSTEMS

MONSOON 2021

LAB #1: Basic HTML building blocks

Create a HTML webpage (on any topic) which include the following elements

- A title in the bar at the top of the web browser using the <title> tag
- One paragraph of text, the content is not important – “Welcome to the homepage of”.
A horizontal line should divide the introduction paragraph from the remaining contents of the webpage
- The webpage should have a light background image.
- Should contain a table. A sample table is given below.

Project Name	Details	Duration

- Has one external link to the course website. The website should open on a new tab.

Evaluation:

We will use **ngrok** to get the link of your home page and view it. After your project is evaluated, you need to upload your file. The steps to upload are

- a) A folder with your <login id> is created in the Labs folder. Go to your folder and create a subfolder Lab1.
- b) Upload the file in the subfolder.
