# MA 518: DATABASE MANAGEMENT SYSTEMS
MONSOON 2021

LAB #4: HTML forms (continued)

In this lab, we will continue with the HTML form of Lab#3.

1. Extend the register tab to collect password from the user. The first name, last name, email id and gender will be stored in "members.txt" as before. A second file named "password.txt" that should store the email id and password. The password should be stored in md5 format.
